SUMMARY / QUESTIONS

1600 Hrs CONCLUSION

□□□

In recent years impressive changes in military trauma care have emerged from continuously studying the experiences gained during on-going conflict. Many of those changes are also visible nowadays in civilian trauma care. This workshop is an excellent opportunity, in particular for reserve medical personnel, to get acquainted with new insights and modalities for treatment. CIOMR's thanks go to the very experienced Training Team of 4626 Squadron RAuxAF (UK)

□□□

ATTENDANCE FEE : 30 euro  
(to be paid at the beginning of the workshop)
